

7. Reverse Integer

Given a 32-bit signed integer, reverse digits of an integer.

Example 1:

Input: 123
Output: 321

Example 2:

Input: -123
Output: -321

Example 3:

Input: 120
Output: 21

```
1  #include <limits.h>
2
3  int reverse(int x) {
4      long long int res = 0;
5
6
7      while (x != 0) {
8          res = (res * 10) + x % 10;
9          x /= 10;
10     }
11
12     return ((res > INT_MAX) || (res < INT_MIN)) ? 0 : (int)res;
13 }
```
